### Presentations & Teachings

#### Maryland University of Integrative Health

- **ACP 719 – Theory: Chinese Medical Therapy and Asian Bodywork:** *This class offers students a survey of additional clinical treatments and therapies that are utilized within the context of Chinese medicine (SU 18 Guest Lecturer)*
- **AOM 748 – Special Clinical Techniques of Chinese Medicine:** *Through hands on learning and demonstration, this class introduces students to additional theories of bodywork and clinical treatment in classical Chinese medicine, such as acupuncture and tuina. (SU 18 Guest Lecturer)*
- **Self Cultivation I (AOM 681)** *This experiential course introduces students to the philosophy, practice, and therapeutic application of qi through the study of classical self-cultivation practices, such as Tai Ji, Qi Gong, and Daoist meditation.*
  - *Ge Hong's Five Healing Sounds (SU 19 Guest Lecturer)*
- **Self Cultivation II (AOM 682 )** *This experiential course builds on previous self-cultivation courses. Students learn the philosophy, practice, and therapeutic application of qi through the study of classical self-cultivation practices, such as Tai Ji, Qi Gong, and Daoist meditation. (SP, SU 20)*
  - *Ge Hong's Five Healing Sounds (SP 19 Guest Lecturer)*
  - *Tao Hong Jing's Opening the Orifices Exercise (SP 19 Guest Lecturer)*
- **Self Cultivation III (AOM 683 )** *This experiential course builds on previous self-cultivation courses. Students learn the philosophy, practice, and therapeutic application of qi through the study of classical self-cultivation practices, such as Tai Ji, Qi Gong, and Daoist meditation (SP 20)*
- **Chinese Herbal Medicine Theory I (CHP 623a )** *This course traces the history of Chinese Herbal Medicine from pre- Han shamanic practices through 2000 years of development to contemporary practice. Focus will be on seminal figures, foundational theories and major currents that continue to shape modern practice. The traditional classification of herbs and formulas will be taught. The basic organization of materia medica and formularies will be presented. Comparison between older classification systems and contemporary systems are discussed.*
  - *History of Chinese Herbal Medicine & Introduction to Chinese Herbal Medicine (SP 18,19,20)*
  - *Introduction to Shang Han Lun Theory (SP 18)*
- **Chinese Herbal Medicine Theory II (CHP 711b)** *Specialties of Chinese Medicine -This series of classes focuses on Chinese Medicine specialties. The fundamental topics presented in year 1 of the program will be revisited through the lenses of these more advanced presentations.*
  - *Men's Health (SU 20)*
- **Chinese Herbal Medicine Theory II (CHP 711c)** *Specialties of Chinese Medicine -This series of classes focuses on Chinese Medicine specialties. The fundamental topics presented in year 1 of the program will be revisited through the lenses of these more advanced presentations.*
  - *Discourse on Gu, Gui and Chong (FA 18, 19, 20)*
  - *Chinese Dietary Therapy (FA 19, 20)*
  - *Yan Kē 眼科/Ophthalmology (FA 19, 20)*
- **CHP 780a/b/c – Core Group I/II/III:** *Pre-clinic meetings giving students a chance to present relevant case histories and receive feedback from experienced supervisors and fellow student herbalists in an open and supportive environment. Student clinicians will have the opportunity to exchange ideas around client care and further develop critical thinking skills. (SP/SU/FA 19, SP,20)*

#### Virginia University of Integrative Medicine

- **Master Tung's Acupuncture (AC 500/ EL 500 )** *This course provides students with an introduction, basic theories, history, and special technics of Master Tong's Acupuncture and location, indication, manipulation and contraindication of Tong's acupoints. (SPR 19, WIN 20)*
- **Yellow Emperor's Inner Classic (AC 510 )** *This course offers a study of the concepts and principles regarding the relationship of man and the universe and the concept of unity of opposites in the classic "Yellow Emperor's Classic (Huang Di Nei Jing)." This text, considered the highest of the Chinese medical classics coming from the Han dynasty canonical period is a must study for all practitioners of TCM and provides the theoretical basis for all branches and systems of Chinese Medicine. (FAL 19)*
- **History of Eastern Medicine (OM 301)** *This course presents a rich and fascinating history that brings to life the subject of Oriental medicine and its journey through millennium, as well as into United States. Students come to understand that they are a link in the unbroken chain of this healing tradition. Students will develop a context and overview of the topics they will be studying in the MSOM program, and the important history behind the theory and practice of Oriental medicine. (WIN 19, FAL 19, SPR 20)*
- **Basic Theory of Oriental Medicine I (OM 302)** *As an introduction to Oriental Medicine, this class includes the basic theory of Oriental Medicine including terminology, the relationship of Yin and Yang, Five Phases, Physiological Functions of Solid and Hollow Internal organs (Zang-Fu theory), chrono-acupuncture, the formation and function of Qi, Blood, Jin, Ye, the eight parameters, twelve officials, and the nature of human beings according to Oriental Medicine. (SPR 19)*
- **Basic Theory of Oriental Medicine II (OM 302)** *This class builds on the information learned in OM302, Basic Theory of Oriental Medicine I. Students will study the fundamental principles of the external etiological factors of disease which cause internal disease states (wind, cold, damp, heat, summer heat and dryness), the internal causes (emotions) of disease, the general laws of pathological change, and the prevention and treatment of diseases. (SUM 19, WIN 20)*

- **Oriental Medicine Diagnosis I (OM311)** *This course builds on the knowledge obtained in the basic theory courses and provides students with an in-depth study of the Four Pillars of traditional oriental medicine diagnosis, including observation, auscultation & olfaction, inquiry, and palpation. Students learn signs and symptoms of various disorders, tongue diagnosis, and pulse, meridian, and other palpation techniques. (SUM 19, SPR 20)*
- **Oriental Medicine Diagnosis II (OM 312)** *This course builds on the diagnosis I class and provides students with in-depth study of the manifestations, etiologies, pathologies, as well as herbal and acupuncture treatments of common Zang-fu organ patterns and complicated zang-fu organ patterns. This course provides students with Oriental Medicine diagnosis methods according to internal organ theory (Zang-fu) (FAL 19)*
